ABSTRACT:

- DoConnect is a popular Q and A form in which techniques questions was asked and answered.

- There are 2 users on the application:
  1.User
  2.Admin
- Users can ask questions based on topic that are sorted for a question.

- Users can register an account on the application and can login to an account and can post their question.

- User will be able to check And search the questions that he has asked in the form of list and he can get answer that he asked.

- User can Login, Logout and can Register the account.

- As a User he can search the questions that he has asked.

INTRODUCTION:

- This Project Do Connect has been developed by using Angular, Java, Spring Boot and MySQL Server.
- The Do Connect project is an application which is based on Q & A Function to solve the Questions in a faster way.
- The main purpose for developing this project in Angular and Java, Spring Boot is to manage all the details about the questions being asked, category of questions, multiple questions, email delivery to the admin if new question is asked.
- There are two categories Available in this project. First one is admin and second one is user. Admin can only approve the questions that user asks & User can get the Answer of the Questions after only Admin approves.
- This Angular project very helpful for maintaining the Login Page and Home Page.
- In this project User can ask the multiple questions and can get more answers to a Single Question.

USER REQUIREMENTS:

- As a user I should be able to login, Logout and Register into the application.
- As a user I should be able to ask any question under any topic.
- As a user I should be able to search the question on any string written in search box.
- As a user I should be able to Answer any question asked.
- As a user I should be able to answer more than one question and more than one time.
- As a user I should be able to chat with other users.

ADMIN REQUIREMENTS :

- As an Admin I should be able to login, Logout and Register into the application.
- As an Admin I should be able to get mail as soon as any new Question is asked or any Answers given.
- As an Admin I should be able to approve the question and Answer. Any Question or Answer will be visible on the platform only if it is approved.
- As an Admin I should be able to delete inappropriate Questions or Answers.

TECHNOLOGIES USED:

- HTML
- CSS
- JAVASCRIPT
